

## Certificate of Analysis

### Cationic polyelectrolyte (polyacrylamide)

**Applications:** Water treatment, paper making, sludge dewatering, textile, sugar and juice, drilling, oil & gas, mining

Charge density	Medium
Molecular weight	High
Chemical Name	Cationic Polyacrylamide / Polyelectrolyte / Flocculant /
Appearance	White grain powder
Solid content (%)	≥ 90
Dissolution time	≤ 90 Min
Inoization degree (%)	4 ~ 62
Remaining monomer	≤ 0.1

Tester:

**Package:** Packed in 25kgs kraft bag or white PE bag on pallet.
